

Homestead

BRING WARM

HOSPITALITY OUTDOORS!

**ENJOY THE GREAT OUTDOORS--
NO MATTER WHAT THE SEASON**

Homestead's handsome radiant heaters are warming outdoor patios, parties, weddings and sporting events all over the United States and Canada. Like sunshine, radiant heat warms people and objects -- like chairs or tables -- rather than the air. Inexpensive to own and operate, Homestead heaters allow you to entertain outside regardless of the season. Choose between portable or permanent mount models. Rain protected and wind resistant. All you need is a level, secure surface to assure warm hospitality at your home.

**QUICK CONNECT COUPLING
SYSTEM AND LPG CYLINDER VALVE**

You won't need tools to install this twist-tight coupling. The connection is leak-free, thanks to Homestead's right-hand threads. A back seat safety feature insures gas can't flow from the cylinder until a positive seal is attained. Our unique LPG valve allows you to conveniently fill the cylinder using existing equipment.

PATENTED BRASS SAFETY GAS VALVE

Homestead has designed a "match-less" ignition system for their radiant heaters. This one-of-a-kind automatic ignition system lights at the flick of a switch -- each and every time. Quality constructed, the chrome-plated burner is AGA rated at 40,000 BTU/hour. Just one 5 gallon LP tank will heat an 8' to 12' circular patio for up to 12 hours. Truly matchless performance!

Installation must conform with local codes.
