Stellar 2000 Plus Series[®] Affordable Total Comfort

Your York[®] Stellar[®] Plus 12 SEER heat pump is designed for optimum efficiency and built to last. The coils are constructed from copper tube and rippled aluminum fins for extended reliability and performance. Stellar Plus is specially designed with all copper fittings and top-of-the-line all copper spun filter-drier for lasting internal protection.

York Stellar Plus heat pumps have the exclusive YorkGuard microprocessor control that protects key components from high and low refrigerant temperatures, as well as sudden power outages. Adaptive demand defrost limits the number of defrost cycles, decreasing cost and increasing reliability and comfort.

Stellar Sound Silencer System reduces the sound rating compared to conventional air conditioning.

New Feature

Benefit

| | |
|-----------------------------------------------------------|------------------------------------------------------------|
| Tough powder coat finish | Extends life of system |
| Solid core filter-drier | Extends life of compressor |
| Compressor mounts and blanket <i>(on selected models)</i> | Very low sound levels |
| Rippled coil fins Enhanced coil fins | Significantly reduced operating costs |
| Rigid coil guard | Protects coil fins |
| 5 yr. component and 10 yr. compressor warranty | Peace of mind your investment is protected |
| YorkGuard V | Self diagnostics Improved comfort Low operating cost |

Leading-Edge Technology to Fight High Energy Costs

Match Your "Indoor Unit" for Maximum Operating Savings

Like all central air conditioners, the Stellar Series is part of a home comfort system. That system includes an "indoor unit" to deliver conditioned air throughout your home, which helps to determine the "SEER" rating your system will achieve. The higher the "Seasonal Energy Efficiency Ratio" (SEER) rating number, the more efficient the system.

The Stellar Series is engineered for energy efficiency compatibility with York indoor units, including York single piece, modular two piece, and variable-speed air handler. The Stellar unit can achieve up to 13 SEER efficiency when matched with a variable-speed air handler.

...with a standard single piece 10 SEER

...two piece modular air handler up to 11 SEER

...with a variable-speed air handler up to 13 SEER

Save \$\$ on Your Energy Bills!

It's easy to calculate your savings with our Operating Cost Table.

| Cooling Efficiency (SEER) | Approximate Annual Operating Cost | | | | | | | |
|---------------------------|-----------------------------------|-------|-------|-------|-------|-------|-------|-------|
| | \$200 | \$300 | \$400 | \$500 | \$600 | \$700 | \$800 | \$900 |
| 6.0 | \$200 | \$300 | \$400 | \$500 | \$600 | \$700 | \$800 | \$900 |
| 10.0 | 120 | 180 | 240 | 300 | 360 | 420 | 485 | 550 |
| 12.0 | 100 | 150 | 200 | 250 | 300 | 350 | 405 | 455 |
| 13.0 | 90 | 135 | 185 | 230 | 280 | 325 | 370 | 415 |

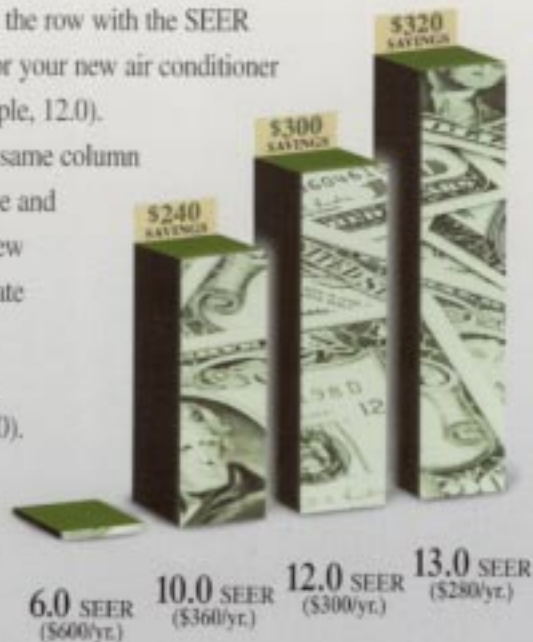

To Use the Operating Cost Table:

1. Determine the Seasonal Energy Efficiency Rating (SEER) of your current air conditioner (the SEER number is sometimes located on a plate attached to the outdoor condenser). For example, if your unit is more than 10 years old, the SEER number is likely about 6.0 SEER.
2. Subtract the electricity cost for a no-cooling and low-heating

month (such as April) from the electric bills for cooling months. Add up the differences for each month to determine your Seasonal Operating Cost. On the row for your unit's SEER number, find the column with the closest approximate Seasonal Operating Cost — for example, \$600.

3. Now, find the row with the SEER number for your new air conditioner (for example, 12.0).

Go to the same column used above and find the new approximate Annual Operating Cost (\$300).

At York® Heating and Air Conditioning, We Provide Comfort Where You Live, Work, and Play

When it's time to heat or cool your personal "Landmark," the York name assures you of the highest standards of design and manufacture. York is the only Fortune 500 company focused solely on heating, ventilation, air conditioning, and refrigeration. That gives us unique insight into designing products that meet your exact requirements. We're finding solutions to today's most critical concerns — energy efficiency, refrigerant alternatives, and indoor air quality — to improve the indoor and outdoor environment.

Count on York to deliver a wide range of product choices for residential and light commercial applications. Our offering includes heat pumps, split-system air conditioners, gas furnaces, air-handling units, and controls — plus chillers and ventilation equipment for larger projects. We're leading the way in developing efficient and environmentally sound choices for homes and businesses. Let us create the environment of success for you.

Your Comfort is Protected

Total Peace of Mind Up to 10 Years

York stands behind each Stellar Plus unit with one of the best warranties in the industry. We offer

a 10-year limited warranty on the compressor, the heart of your system, and a 5-year limited warranty on all other parts. For *total peace of mind* up to 10 years, ask your York dealer about the optional YORKCare™ Comfort Plans.

Depending on the plan you select, and the coverage that's available on your new equipment, a YORKCare Comfort Plan could provide total parts-and-labor coverage for up to 10 years.
